PROFESSIONAL CERTIFICATION IN AI-POWERED WEB DEVELOPMENT

Instructed By:
Ihjas Abdullah(BICT)Hons
Software Engineer

Introduction

This course is designed for students who have completed O/L or A/L and want to gain a strong foundation in Web Development. The course covers HTML, CSS, JavaScript, basic design principles, and introduction to web hosting and deployment.

It is structured into modules with practical hands-on exercises and projects to ensure students can build functional and visually appealing websites by the end of the program.

Modules

01 Introduction to Web Technologies

- 1.1 What is the Web?
- 1.2 Client-Server Model
- 1.3 Overview of Web Technologies
- 1.4 Setting up a Development Environment (Editors, Browsers, Tools)

02 HTML5 Fundamentals

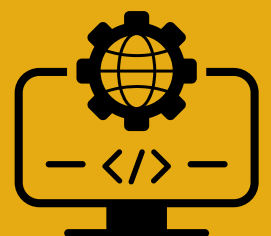

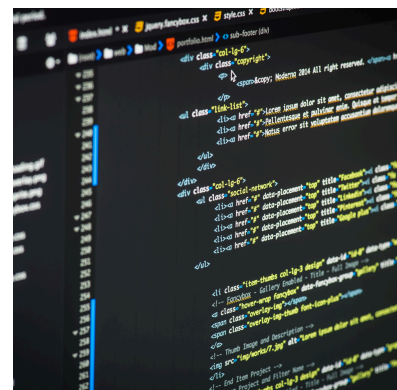

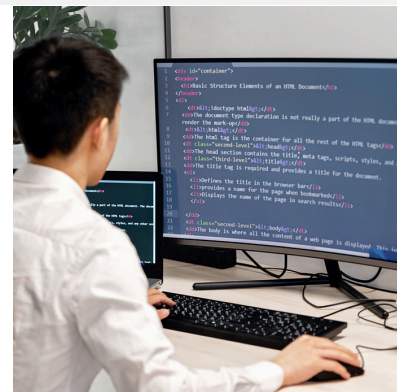

- 2.1 Introduction to HTML5
- 2.2 Basic Structure of a Web Page
- 2.3 Headings, Paragraphs, Links, Lists
- 2.4 Images, Tables, Forms, Multimedia
- 2.5 Semantic HTML and Best Practices
- 2.6 Mini Project: Personal Profile Page

03 CSS Fundamentals

- 3.1 Introduction to CSS
- 3.2 Selectors, Colors, and Fonts
- 3.3 Box Model (Margin, Padding, Borders)
- 3.4 Layouts: Flexbox and Grid
- 3.5 Styling Forms and Navigation Bars
- 3.6 Responsive Design Basics
- 3.7 Industry Related Frameworks in CSS - Bootstrap
- 3.8 Mini Project: Styled Portfolio Page

04 Fundamentals of JavaScript

- 4.1 Introduction to JavaScript
- 4.2 Variables, Data Types, and Operators
- 4.3 Functions and Control Structures
- 4.4 DOM Manipulation (Events, Queries, Updating Content)
- 4.5 Forms Validation with JavaScript
- 4.6 Basic Animations and Interactivity
- 4.7 Mini Project: Interactive Quiz

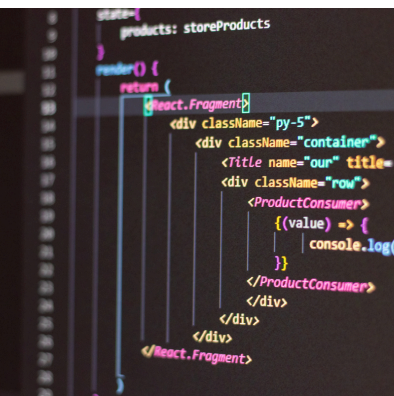

05 Emerging Technologies & AI Tools for Web Development

- 5.1 How to use ChatGPT effectively for brainstorming, coding help, and debugging
- 5.2 Using AI to generate content (text, images, code snippets) responsibly
- 5.3 Introduction to No-Code/Low-Code Platforms.
- 5.4 Exploring Future Trends in Web Development
- 5.5 Introduction to Version Control (Git Basics)

06 Web Hosting & Deployment

- 6.1 Introduction to Web Servers.
- 6.2 Domain Names and Hosting.
- 6.3 Publishing Websites (GitHub Pages, etc.).
- 6.4 Final Project Guidelines.

07 Final Project & Review

- 7.1 Students build a complete functional website (e.g., Portfolio, Blog, or Business Website).
- 7.2 Presentation and Feedback Session.
- 7.3 Review and Career Path Guidance.
